

Application Overview

RevConnect is a social media project that aims to provide a platform for personal users, businesses, and creators to connect with each other. The core functional scope includes features such as personal user accounts where users can post, like, comment and share posts, edit, and delete their posts. The project also includes business and creator accounts, which allow them to create and promote posts.

Core Functional Scope

Personal user account

As a personal user, I should be able to:

1. Register myself and create an account. *
2. Login to my account. *
3. Create a basic profile with name and bio. *
4. Create a post, like, comment and share the posts. *
5. Edit and delete the posts created by me. *
6. Send connect requests to users.
7. Follow other users (normal users, Business users and content creators). *
8. Get email notifications about connect requests, a new follower, and any post activity in the following businesses users and content creators.
9. Chat with other users in the application.

Creator/Business account:

As a creator/business account user, I should be able to:

1. Register myself and create an account. *
2. Login to my account. *
3. Create a business profile or content creator profile. *
4. Create posts, like, and comment on the posts of users or Business/Creator accounts. Edit and delete the posts created from the creator account. *
5. Add links to profiles for business endorsements.
6. Chat with other users in the application.
